Regional Expert Seminar on

WATER, CLIMATE CHANGES AND AGRICULTURE

June 23 – 27, 2014 Bogor, Indonesia

Funded by

DAAD

Overview

The Regional Expert Seminar aims to bring together scientists, policy makers and practitioners at different levels of government, international organizations, and academic institutions to exchange and share their experiences and research results about aspects of water, climate changes and agriculture, and discuss the practical challenges encountered and the solutions adopted.

Objective

Participants will gain profound knowledge on:

- Sustainable water resources management approaches in response to climate changes in tropical agriculture
- Climate changes and water security in tropical agriculture.

Topics

- Climate changes and sustainable water management
- Climate changes, food and water security
- Wastewater management for agriculture
- River basin management and water allocation

Seminar Organization

The seminar will consist of lectures, parallel presentation as well as an excursion. The seminar will take place at Bogor Agriculture University, Indonesia. The language of the workshop will be English.

Qualified paper will be considered for publication in CLEAN journal ([www.onlinelibrary.wiley.com/10.1002/\(ISSN\)1863-0669](http://www.onlinelibrary.wiley.com/10.1002/(ISSN)1863-0669))
